

Gracie Jaime

ASB Executive Board Member

October 2, 2020

Position Assessment: This school year, my position is in charge of various tasks. At the district school board meeting on September 14th, I was sworn in. During the meeting, I reported on all the schools in the district and certain changes that have been applied. I also voted on policies regarding bullying and harassment. From the meeting, I received information about students returning to school. Grades K-3rd have returned but there are no future plans for the high school. I'm also club committee chair and thus far we have been working on a club rush video. I have been in contact with advisors and presidents. In regards to the student senate, there are no plans for future meetings.

Professional Development: I have been able to use and develop professional skills through the school board meetings. By being a board member, you hold a professional position that votes on policies/changes that pertain to the school. Also by working with other board members, I have been able to utilize my skills in a professional environment. In regards to school, I have been meeting deadlines with my assignments. By researching careers for my mock interview, I have been able to get a better understanding of the profession I want to work in. The research helps me receive a better understanding of what levels of education I need and what to expect in this career.

Concerns/Change: My concern I have for the leadership class is the outcome of fall fest. I am worried we will not have participation from the student body. My change for leadership is making the freshmen a priority. It is their first year and with the current circumstances, they need all the help they can get.

Positive Comment: I have a positive comment for Brendan Lan. Although his school schedule is messed up, he still makes an effort to attend our 6th period class. He also is executing his job as president and I'm excited to see what the future holds for fall fest.

My Impact: By being a part of the link crew, I am a mentor to the freshmen. My peers and I had a scheduled zoom call with our group of freshmen. Although only one showed up, I was able to ask them questions and give advice about managing school.
